Kids' Corner

Scarecrows - Activity

Let's make a scarecrow to protect our plants!

With our veggie gardens now in full swing, we have to protect our vegetables from the birds that find our crops delicious and delectable! So let's have some fun making scarecrows!

Scarecrows have been around for centuries. Greek farmers would make them out of wood to protect their grape vines, and the Egyptians used them to protect their wheat fields from birds. Do you remember the wonderful scarecrow from the Wizard of Oz movie? Do you know of any other scarecrows in your neighbourhood?

What could be useful…

Parents to help you
Old clothes
Hat
Scarf
Gloves
Two poles tied to make the frames to hang clothes off
Some veg or plants to protect ...
Have fun!
